Admission Policy of Graduate School of Environmental Engineering (Doctoral Program)

●Graduate Programs in Environmental Systems

Course	Expected student image	Expected Ability		
		①Knowledge and skills	②Abilities such as thinking, judgment and expression	③Independent attitude for learning in cooperation with a variety of people
Resources and Chemical Systems Course	<ul style="list-style-type: none"> · He/she has an interest in scientific fields including energy, the environment, and resources, and aims to be a world-leading chemical/environmental engineer or researcher. · He/she aims to develop or construct innovational new technologies or theories. 	<ul style="list-style-type: none"> · He/she has sufficient knowledge for researching advanced chemistry and environmental engineering. · He/she has a clear vision about solving problems regarding energy, the environment, and resources. · He/she has sufficient language abilities to be able to write advanced studies/reports and debate with experts. 	<ul style="list-style-type: none"> · He/she has the ability to see the essence of the problem in various fields including energy, the environment, and resources, and to find solutions from an advanced perspective, prioritizing according to importance/emergency level. · In various fields including energy, the environment, and resources, he/she has the ability to find solutions to problems from an advanced perspective while logically considering multiple alternatives, and then clearly explaining those solutions to other people. 	<ul style="list-style-type: none"> · He/she has a deep interest in scientific fields including energy, the environment, and resources, and has the desire to research independently and the dynamism to lead others, with diverse and comprehensive viewpoints. · He/she has the ability to lead problem solving through cooperation with others by finding multiple problem solving methods via consultation and debate, irrespective of his/her own expertise.
Biosystems	<ul style="list-style-type: none"> · He/she aims to gain high-level, specialist knowledge in subjects such as the environment, life and medicine, which form the basis of chemistry and biology. · He/she wants to contribute to society by gaining the ability to actively participate on the international stage in fields such as the environment, life and medicine. 	<ul style="list-style-type: none"> · He/she has the specialist knowledge and skills to develop technologies while considering the environment, society, and ecological systems. He/she also has wide-ranging knowledge that is important for refining this information. 	<ul style="list-style-type: none"> · He/she has the mind and judgment to see the essence of various problems in fields such as the environment, life and medicine, and has the ability to publish results gained through research in appropriate methods such as a paper or conference. 	<ul style="list-style-type: none"> · He/she shows a good attitude for solving problems through positive debate with researchers, both domestic and worldwide, with regards to the various problems in fields such as the environment, life and medicine.
Environmental and Ecological Systems	<ul style="list-style-type: none"> · He/she aims to be a researcher or educator who can actively participate in building environmental social systems locally or in developing countries, especially in Asia. · He/she aims to gain very highly specialized knowledge for building a sustainable society. 	<ul style="list-style-type: none"> · He/she has specialist academic ability in the fields of natural science and mathematics that form the basis of environmental investigations, environmental planning and ecosystem management. He/she also has creative and practical knowledge to be able to lead in the development of societies that are environmentally friendly and symbiosis with nature. · He/she has the ability to independently solve problems using specialist skills and methods related to social/environmental field surveys, environmental simulations and environmental management. 	<ul style="list-style-type: none"> · He/she has the ideas and judgment to deal with actual environmental problems, with a wide view of international environmental society, based on a background of advanced academic research. 	<ul style="list-style-type: none"> · He/she has an wide interest in fields such as resources, energy, natural ecosystems, economics and administration in relation to environmental problems, and has the knowledge to perform pioneering research from an advanced perspective. · He/she has the knowledge to independently tackle advanced and international environmental problems in cooperation with relevant organizations such as academic societies, companies and governments.

●Graduate Programs in Environmental Engineering

Course	Expected student image	Expected Ability		
		①Knowledge and skills	②Abilities such as thinking, judgment and expression	③Independent attitude for learning in cooperation with a variety of people
Mechanical Systems Engineering	<ul style="list-style-type: none"> · He/she aims to be a researcher or educator who can actively participate internationally and interdisciplinary using advanced mechanical system technology, while pursuing the "sustainable development" of both environmental burden reduction and continued economic development. · He/she will not mind making efforts to utilize advanced expertise in mechanical engineering. · He/she has the desire to attempt advanced research, equipped with creativity and independence. 	<ul style="list-style-type: none"> · He/she has specialist knowledge and skills in the field of mechanical engineering and has the academic ability and aptitude for gaining further specialization. · He/she has the basic cultural and ethical perspective needed to be a mechanical researcher or educator. · He/she has the necessary ability to communicate in Japanese and English. 	<ul style="list-style-type: none"> · He/she has the ability to logically think about, assess and solve mechanical engineering problems from an advanced perspective, and can convey his/her own ideas and consideration results etc. clearly to others. 	<ul style="list-style-type: none"> · He/she has the ability to assertively tackle mechanical engineering problems from an advanced perspective in cooperation with a variety of people.
Architecture	<ul style="list-style-type: none"> · He/she aims to gain a high ability to be able to actively participate on the international stage with highly specialized knowledge to be able to create futuristic constructions. · He/she aims to be a designer who understands technology or a highly specialized professional or, in particular, a researcher who understands design. 	<ul style="list-style-type: none"> · He/she understands that architecture is the forming of space and an abundant human environment that links the past to the future, understands the essence of architecture from a general perspective, and has that high-level specialist knowledge. · He/she has a variety of abilities necessary for a high-level architect/engineer, such as the ability to make constructions safe, the ability to create a comfortable space, the ability to express artistry, and the ability to express ideas to clients. 	<ul style="list-style-type: none"> · He/she has the ability to extract various problems from social phenomena in architecture with an international perspective, explain his/her own thinking/judgment processes to solve these problems, and publish research via meetings, international conferences and dissertations. 	<ul style="list-style-type: none"> · He/she has the ability to plan projects with others in a community or organization, and finalize the projects in the form of a dissertation or construction, etc. He/she also has the desire and attitude to consider harmony with the environment, and solve problems from the ethical viewpoint of an engineer.

● Graduate Programs in Information Engineering

Course	Expected student image	Expected Ability		
		① Knowledge and skills	② Abilities such as thinking, judgment and expression	③ Independent attitude for learning in cooperation with a variety of people
Computer Science	<ul style="list-style-type: none"> · He/she aims to utilize high-level, specialist knowledge and skills for computer science, in particular, artificial intelligence, image processing, networks, information security and modeling. · He/she aims to be an leading researcher or educator with the ability to actively participate on the international stage. 	<ul style="list-style-type: none"> · He/she has comprehensive specialist knowledge about information system engineering, and specialist knowledge about computer science, in particular, information communication, information processing, information security and software. · He/she has the skills to design and install a major network and image processing system as a practical discipline of computer science, to meet the needs of information-oriented society. 	<ul style="list-style-type: none"> · He/she has the ability to plan/suggest problem solving methods in the field of computer science, evaluate the results and form conclusions, arrange these processes into a dissertation, and publish them. 	<ul style="list-style-type: none"> · In the field of computer science, he/she can communicate effectively with other people in a community or organization, and has the dynamism to independently tackle problem solving with a sense of social and ethical responsibility.
Applied Information Systems	<ul style="list-style-type: none"> · He/she aims to utilize high-level, specialist knowledge and skills for electronic/integrated circuits, measurement, control, software, and robots and bio-information systems that integrate these elements. · He/she aims to be an leading researcher or educator with the ability to actively participate on the international stage. 	<ul style="list-style-type: none"> · He/she has comprehensive specialist knowledge about information system engineering, and specialist knowledge about electronic/integrated circuits, measurement control, software, and systems that integrate these elements. · He/she has the skills to design and install a major robot and bio-information system as an integration of electronic/information/measurement and control, to meet the needs of information-oriented society. 	<ul style="list-style-type: none"> · He/she has the ability to plan/suggest problem solving methods in the integrated field of electronic/information/measurement and control engineering, evaluate the results and form conclusions, arrange these processes into a dissertation, and publish them. 	<ul style="list-style-type: none"> · In the integrated field of electronic/information/measurement and control engineering, he/she can communicate effectively with other people in a community or organization, and has the dynamism to independently tackle problem solving with a sense of social and ethical responsibility.

1. Schedule for Applying

Application Period	July 10, 2023 (Monday) ~ July 24, 2023 (Monday) * Screening of Qualifications for Applying : Deadline : June 16, 2023 (Friday)
Examination Date	August 22, 2023 (Tuesday) Meet 20 minutes before the examination starts. (Refer to page 10-11) * This may change if the examination cannot take place according to schedule due to unforeseen circumstances such as a natural disaster. Notice of alterations to the examination schedule will be given out via the university's website. https://www.kitakyu-u.ac.jp/env/lang-en/admissions.html 
Examination Site	The University of Kitakyushu Hibikino Campus (1-1 Hibikino, Wakamatsu-ku, Kitakyushu, Fukuoka, JAPAN)
Announcement of Examination Results	September 1, 2023 (Friday)

※ 【About Online Selection】

Applicants who are approved by Graduate School Management Committees may take the online oral examinations instead of the regular examination subjects. Contact the professor you would like to have as their research supervisor for detail. If you do not know how to contact the professor who you would like to have as your research supervisor, refer to 《Research Supervisors and Research Content of Courses in the Graduate Program》 on page 17.

2. Admissions Quota

◆ October 2023 Enrollment Number to be admitted

Graduate School	Graduate Programs	General Selection	Special Selection for People in Employment
Graduate School of Environmental Engineering	Graduate Programs in Environmental Systems	a few	a few
	Graduate Programs in Environmental Engineering	a few	a few
	Graduate Programs in Information Engineering	a few	a few

◆ April 2024 Enrollment Number to be admitted

Graduate School	Graduate Programs	General Selection	Special Selection for People in Employment
Graduate School of Environmental Engineering	Graduate Programs in Environmental Systems	8	a few
	Graduate Programs in Environmental Engineering	8	a few
	Graduate Programs in Information Engineering	6	a few

《Admission for People in Employment》

At the Graduate School of Environmental Engineering, we can provide classes and research guidance at night or at specific times and periods for people already in employment who wish to improve on the skills and knowledge they have already acquired through their work, or wish to acquire new skills and knowledge required by their profession.

3. Qualifications for Applying

◆October 2023 Enrollment Requirements

Applicants must meet one of the requirements below. However, the Special Selection for People in Employment is limited to people who have, by September 30, 2023, at least two years' work experience related to their graduate program at either an educational or research organization, government/municipal body, or corporation (including their international cooperation activities in NGO or NPO etc.).

Applicants do not need to be currently working in such a position, so long as they have acquired two years' experience or more.

- (1) Has a master's degree or expects to obtain a master's degree by September 30, 2023.
- (2) Has been awarded, or expects to be awarded by September 30, 2023, a degree equivalent to a master's degree in a country other than Japan.
- (3) Has been awarded, or expects to be awarded by September 30, 2023, a degree equivalent to a master's degree by taking a correspondence course in Japan provided by a school outside Japan.
- (4) Has been awarded, or expects to be awarded by September 30, 2023, a master's degree or the equivalent of a professional degree from completion of a course at an educational facility in Japan that offers courses of overseas graduate schools considered a part of the school education system of the relevant foreign country, as designated separately by the Minister of Education, Culture, Sports, Science and Technology.
- (5) A person designated the following by the Minister of Education, Culture, Sports, Science and Technology (under Notification No. 118 issued in 1989 by the Ministry of Education, Culture, Sports, Science and Technology) (Note):
"A person who, after graduating university or completing 16 years of school education outside of Japan or completing 16 years of another country's school education by taking correspondence courses offered by an overseas school while in Japan, has been involved in research for at least two years at a university or research institute, and due to his/her research record has been recognized by the Graduate School of Environmental Engineering's Management Committee at the University of Kitakyushu (hereon referred to as the Management Committee) as having ability equal or above to someone with a master's degree."
- (6) Has been recognized through an individual screening process performed by the Management Committee as having the academic ability equal or above someone with a master's degree, and who has or will have reached the age of 24 by September 30, 2023 (Note).

(Note) Applicants applying under requirements (5) or (6) will undergo a preliminary screening of their qualifications.

◆April 2024 Enrollment Requirements

Applicants must meet one of the requirements below. However, the Special Selection for People in Employment is limited to people who have, by March 31, 2024, at least two years' work experience related to their graduate program at either an educational or research organization, government/municipal body, or corporation (including their international cooperation activities in NGO or NPO etc.).

Applicants do not need to be currently working in such a position, so long as they have acquired two years' experience or more.

- (1) Has a master's degree or expects to obtain a master's degree by March 31, 2024.
- (2) Has been awarded, or expects to be awarded by March 31, 2024, a degree equivalent to a master's degree in a country other than Japan.
- (3) Has been awarded, or expects to be awarded by March 31, 2024, a degree equivalent to a master's degree by taking a correspondence course in Japan provided by a school outside Japan.
- (4) Has been awarded, or expects to be awarded by March 31, 2024, a master's degree or the equivalent of a professional degree from completion of a course at an educational facility in Japan that offers courses of overseas graduate schools considered a part of the school education system of the relevant foreign country, as designated separately by the Minister of Education, Culture, Sports, Science and Technology.

- (5) A person designated the following by the Minister of Education, Culture, Sports, Science and Technology (under Notification No. 118 issued in 1989 by the Ministry of Education, Culture, Sports, Science and Technology) (Note):
“A person who, after graduating university or completing 16 years of school education outside of Japan or completing 16 years of another country’s school education by taking correspondence courses offered by an overseas school while in Japan, has been involved in research for at least two years at a university or research institute, and due to his/her research record has been recognized by the Graduate School of Environmental Engineering’s Management Committee at the University of Kitakyushu (hereon referred to as the Management Committee) as having ability equal or above to someone with a master’s degree.”
- (6) Has been recognized through an individual screening process performed by the Management Committee as having the academic ability equal or above someone with a master’s degree, and who has or will have reached the age of 24 by March 31, 2024 (Note).

(Note) Applicants applying under requirements (5) or (6) will undergo a preliminary screening of their qualifications.

【Screening of Qualifications for Applying】

*For applicants applying under requirements (5) or (6)

The Management Committee screens the qualifications for applying.

Applicants must contact the professor you would like to have as their research supervisor before submitting the following documents. If you do not know how to contact the professor who you would like to have as your research supervisor, refer to 《Research Supervisors and Research Content of Courses in the Graduate Program》 on page 17.

(a) Documents to be submitted *Refer to “Documents for Submission” on page 7-8.

- Application Form (Form 1)
- Research Plan Survey (Form 5)
- Statement of Reason for Application (Use A4-size, free form)
- Screening of Qualifications for Applying Application (Form 6)
- Official transcripts issued by graduated or current university/school
 - * For transcripts written in neither Japanese nor English, a Japanese or English translation must be attached.
- Details of previous academic performances and research

(b) Deadline for Screening Applications: June 16, 2023 (Friday)

(c) Submissions and Inquiries to:

The University of Kitakyushu, Administrative Office
Academic Affairs Department, Entrance Examinations Division
1-1 Hibikino, Wakamatsu-ku, Kitakyushu City, Fukuoka, JAPAN, 808-0135
TEL: +81-93-695-3340
E-mail: nyushi@kitakyu-u.ac.jp

【For Applicants applying in Japan】

Submit the documents listed above at the counter of Entrance Examinations Division or send them **via registered express mail**, making sure that they arrive before the deadline for screening applications.

【For Applicants applying from outside Japan】

Send the documents listed above via EMS or a similar mail service before the deadline for screening applications. **Before mailing the documents, applicants should also e-mail them as PDF file attachments to the Entrance Examinations Division before the deadline for screening applications.**

(d) Notification of the Results: Results of the screening will be e-mailed directly to the applicant.

4. Application Procedures

Applicants applying in Japan should submit the documents listed below at the counter of Entrance Examinations Division, or send **via registered express mail**, making sure that they arrive before the deadline for applications. Applicants applying from outside Japan should send the documents listed below via EMS or a similar mail service before the deadline for applications. **Before sending the documents, applicants should also e-mail them as PDF file attachments to the Entrance Examinations Division before the deadline for applications shown below.**

Applicants must contact the professor you would like to have as their research supervisor before applying. If you do not know how to contact the professor who you would like to have as your research supervisor, refer to 《Research Supervisors and Research Content of Courses in the Graduate Program》 on page 17.

(1) Application Period:

July 10, 2023 (Monday) - July 24, 2023 (Monday)

(2) Submission Desk Office Hours (excludes Saturdays, Sundays, and Public Holidays):

Monday - Friday, 8:30 - 16:00 (until 17:00 on the date of deadline)

* Mailed items that arrive on or after July 25, 2023 (Tuesday) will only be accepted if they are postmarked no later than July 23, 2023 (Sunday) .

(3) Mailing Address for Submissions

The University of Kitakyushu, Administrative Office,
Academic Affairs Department, Entrance Examinations Division
1-1 Hibikino, Wakamatsu-ku, Kitakyushu City, Fukuoka, JAPAN, 808-0135
TEL: +81-93-695-3340 E-mail: nyushi@kitakyu-u.ac.jp

(4) Documents for Submission (See below)

Document Name	Notes
Application Form (Form 1)	Fill all the necessary items in the bold-framed space on Form 1. Glue a 4cm×3cm color photograph in the designated space showing your upper body, without a hat and on a plain background, looking straight ahead. Write your name on back of the photograph.
Test Admission Card (Form 2)	Fill in all the necessary information in the bold-framed areas on Form 2.
Photograph Card (Form 3)	Fill in all the necessary information in the bold-framed areas on Form 3. Attach the photo in the same way described in the “Application Form” section above.
* Applicants applying in Japan ONLY Address Card (Form 4)	Write your name, address, and postal code.
Research Plan Survey (Form 5)	State the research plan on Form 5 clearly. You must contact the professor you would like to have as your research supervisor before applying.
Statement of Reason for Application	Write your reasons for applying on one sheet of A4 size paper, free form. You may choose whatever format you would like, but make sure to include your name, and the name of the graduate program and course you would like to take.
* Applicants applying in Japan ONLY Return Envelope for the Test Admission Card	This should be a standard envelope ("Nagagata" Long-form No.3) with your name and mailing address and JPY 344 worth of stamps attached to it.
Official Transcript of Grades from Your Previous Graduate School	Applicants should submit an official transcript of their grades from the graduate school they have graduated from or are still enrolled at. * For transcripts written in neither Japanese nor English, a Japanese or English translation must be attached.

Document Name	Notes
Documents showing proof of Qualifications for Applying	<p>A Certificate of Graduation or Prospective Graduation or Certificate of Enrollment in a master's course issued by the applicant's graduate school. (Original or certified copy)</p> <p>* In case the applicant cannot submit the above certificate, submit a photocopy of the certificate which is duly certified by the graduate school, Embassy / Consulate, or notary public's office.</p> <p>* For certificates written in neither Japanese nor English, a Japanese or English translation must be attached.</p>
<p>Examination Fee (JPY 30,000)</p> <p>Bank charges incurred when wiring the money from an overseas bank account are to be paid by the remitter.</p>	<p>【Applicants applying in Japan】 Buy a postal order (Yubin Kawase) worth JPY 30,000 from a post office in Japan and send it with the other application documents. *Do not write anything on the postal order (Yubin Kawase).</p> <p>【Applicants applying from outside Japan】 ※Japanese YEN only Transfer JPY 30,000 to the account specified below and send a copy of the "Application of Remittance" form along with your application.</p> <p>Bank name: The Bank of Fukuoka, Ltd. Bank code (Swift Code): FKBKJPJT Branch name: Kitakyushu Main office Bank Address: 2-2-18 Sakaimachi Kokurakitaku Kitakyushu City Fukuoka Account number: 2555152 Account Holder: Kouritsudaigakuhoujin kitakyushushiritsudaigaku Rijichou Tsuda Junji Remittee Address: 1-1 Hibikino Wakamatsu-ku Kitakyushu City</p> <p>(Note) All bank transfer fees must be covered by the remitter (i.e. the applicant). The bank transfer fees charged by The University of Kitakyushu's bank, the Bank of Fukuoka, are JPY 2,500, but applicants are advised to check the banking fees in the country from which they are applying. For banking charges in the country from which the applicant is applying, it is up to the applicant to check the amounts.</p>
Certificate of Residence (JUMINHYO) or Copy of Passport	<p>【Applicants applying in Japan】 Submit a Certificate of Residence (JUMINHYO) with your residency status and period of stay that has been issued within one month of the application.</p> <p>【Applicants applying from outside Japan】 Submit a copy of the passport (the pages showing the applicant's face and the passport's date of expiration).</p>

* Applicants applying in the Special Selection for People in Employment must also submit the following document:

Document Name	Notes
Certificate of Employment	<p>This should be issued by the place of employment (there is no set format).</p> <p>* It should prove that the applicant has been working for at least two years of continuous employment</p> <p>* For certificates written in neither Japanese nor English, a Japanese or English translation must be attached.</p>

【Notes about the Application】

- After the application is submitted, the examination fees will not be returned, and no changes to documents will be accepted under any circumstances.
- If a false statement is found in the documents, admission to the university will be revoked even if the applicant passed the entrance examination.
- Once received by the university, the application documents will not be returned after submission.
- Applicants who have taken the examination under the condition that they meet the application qualifications by the following deadline but do not then meet the qualifications for applying, will have their admission revoked even if they have passed the entrance examination.

October 2023 Enrollment: by September 30, 2023

April 2024 Enrollment: by March 31, 2024

【Special consideration for applicants with physical disabilities】

Applicants with physical disabilities who might require special consideration for the entrance examination and enrollment at the university are required to undergo a screening in order to receive such consideration. Please consult the university in advance and provide the necessary documents at least 2 weeks before applying. Based on the results of the screening, we will notify you of the details of any special measures that have been deemed necessary. Please include this notification with your application.

《Contact》

The University of Kitakyushu, Administrative Office,
Academic Affairs Department, Entrance Examinations Division
1-1 Hibikino, Wakamatsu-ku, Kitakyushu City, Fukuoka, JAPAN, 808-0135
TEL: +81-93-695-3340 E-mail: nyushi@kitakyu-u.ac.jp

【Exemption from the Entrance Examination Fee】

In order to reduce their economic burden and provide an opportunity for academic advancement, applicants who were adversely affected by the heavy rains in July 2020 are exempted from the entrance examination fee for 2023.

《Contact》

The University of Kitakyushu, Administrative Office,
Academic Affairs Department, Entrance Examinations Division
TEL: +81-93-695-3340
URL: <https://www.kitakyu-u.ac.jp/entrance-exam/tuition/absolution.html>

【Managing Personal Information】

The University of Kitakyushu manages all personal information very carefully in accordance with related laws and provisions. The university will never share an applicant's personal information with a third party, and will only use it for the following purposes:

- Applicants' names, birthdays, contact information and so on are used for the selection process, contacting successful applicants, admission procedures, surveys and research, and other related work.
- The personal information of successful applicants is used for guidance before enrollment, matters relating to academic affairs after enrollment, student support, and collection of tuition fees.

5. Selection Process and Examination Subjects

【Selection Process】

Applicants are selected based on the results of the examination and the application documents.
For the Special Selection for People in Employment, the applicant's career and research are emphasized in the selection process.

【Examination Subjects】

Applicants who are approved by Graduate School Management Committees may take the online oral examinations instead of the regular examination subjects. Contact the professor you would like to have as their research supervisor for detail. If you do not know how to contact the professor who you would like to have as your research supervisor, refer to 《Research Supervisors and Research Content of Courses in the Graduate Program》 on page 17.

◆Graduate Programs in Environmental Systems

○Resources and Chemical Systems

《General Selection》 《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's previous research and research plan for Graduate School of Environmental Engineering) (Presentation on a projector)	10 : 00 -

○Biosystems

《General Selection》 《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's previous research and research plan for Graduate School of Environmental Engineering) (Presentation on a projector)	10 : 00 -

○Environmental and Ecological Systems (Note)

《General Selection》 《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's previous research and research plan for Graduate School of Environmental Engineering) (Presentation on a projector)	10 : 00 -

(Note) If applicants have documentation showing their language skills in Japanese or English, please bring it to the examination day.

(Example: Your score in the Japanese Language Proficiency Test, TOEIC (TOEIC L & R) Score, TOEFL Score, etc.) ※ This is not mandatory.

◆Graduate Programs in Environmental Engineering

○Mechanical Systems Engineering

《General Selection》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's master's thesis) (Presentation on a projector) (Note)	10 : 00 -

(Note) Please prepare a powerpoint data for your presentation.

《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's master's thesis or previous research) (Presentation on a projector) (Note)	10 : 00 -

(Note) Please prepare a powerpoint data for your presentation.

○Architecture

《General Selection》 《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's previous research and research plan for Graduate School of Environmental Engineering) (Presentation on a projector) (Note)	10 : 00 -

(Note) Please prepare a powerpoint and PDF data for your presentation.

◆Graduate Programs in Information Engineering

○Computer Science

○Applied Information Systems

《General Selection》 《Special Selection for People in Employment》

Examination Subjects	Examination Time (Japan Time)
Oral examinations & Interview (Including a presentation about the applicant's previous research and research plan for Graduate School of Environmental Engineering) (Presentation on a projector) (Note)	10 : 00 -

(Note) Please prepare a powerpoint data for your presentation.

6. Examination Site

The University of Kitakyushu, Hibikino Campus

(1-1 Hibikino, Wakamatsu-ku, Kitakyushu City, Fukuoka, JAPAN)

※Means of transportation: Kitakyushu City Bus, Nishitetsu Bus

Take a bus from JR Orio Station bus stop and get off at Gakken-toshi-Hibikino.

It takes about 20 minutes.

«Online Selection»

For specific adjustments related to online interviews, the professors of each course will contact applicants later.

7. Points to be Aware of Regarding the Examination

- (1) Make sure to print out your Test Admission Card and bring it. If you have not received your Test Admission Card 3 days prior to the examination date, contact Academic Affairs Department, Entrance Examinations Division. (nyushi@kitakyu-u.ac.jp)
- (2) You will not be allowed to take the interview if you are late.
- (3) If you are late due to lengthy delays on the public transportation service, the prescribed examination time will be extended as necessary. To verify the delay, get a note of verification when you get on/off the train or bus.
- (4) Bring your pens and pencils, and a wristwatch (one without calculation, translation, and dictionary functions). We cannot provide any such test-taking necessities.
- (5) Do not come to the test site by a private car.
- (6) Please come to the examination site by following the guidance signs in the university.

«Online Selection»

- (1) We require that you show us the Test Admission Card during the online examination. If you have not received the card 3 days prior to the examination date, contact the Entrance Examinations Division. (nyushi@kitakyu-u.ac.jp)
- (2) Please ensure you are ready to connect to the Internet 20 minutes before the examination starts.
- (3) Interview time may change depending on the number of applicants.

8. Announcement of Examination Results

The application numbers of successful examinees will be displayed on the university website. A Letter of Success will also be sent to the successful applicants. We will not respond to telephone inquiries regarding the results.

Time of Announcement	Around 10 :00 am, September 1, 2023 (Friday)
Location of Announcement	The website of The University of Kitakyushu (https://www.kitakyu-u.ac.jp/)

9. Admission Procedures

Details of the procedure for admission will be sent with the Letter of Success.

Period to complete the Admissions Procedure October 2023 Enrollment	September 4, 2023 (Monday) - September 7, 2023 (Thursday)
Period to complete the Admissions Procedure April 2024 Enrollment	January 15, 2024 (Monday) - January 18, 2024 (Thursday)

(Note 1) Once paid, the admission fee will not be returned under any circumstances.

(Note 2) Successful applicants who do not complete the admission procedure during this time will be deemed as having opted out of their place at the university. The period for carrying out the admissions procedure will not be extended under any circumstances.

(Note 3) Successful applicants who complete payment of the admission fees and submit the necessary documents during this period will be admitted to the university.

(Note 4) The Test Admission Card is necessary for the admissions procedure. Please keep it safe.

10. Admission and Other Fees (Note 1)

Fees	Amount	Note
Admission Fee	Residents of Kitakyushu City JPY 282,000	(Note 2)
	Non-residents of Kitakyushu City JPY 423,000	
Alumni Association fee	JPY 50,000	Those who have graduated from this School and have already paid are exempt.
Support Association fee	JPY 30,000	(Note 3)
Personal accident insurance	3 years' coverage JPY 2,600	
Personal liability insurance	3 years' coverage JPY 1,020	

(Note 1) The amounts indicated above are for enrollment in 2023 and may change.

(Note 2) A resident of Kitakyushu City is defined as a person who qualifies as a Kitakyushu City taxpayer or exempted taxpayer (or whose spouse or other close relative [first degree relative] qualifies) during the year prior to enrollment, and who is also a resident of Kitakyushu City when the admission fees are paid. To be a taxpayer (or an exempted taxpayer) of Kitakyushu City in the previous year of the enrollment, a person who will enroll in October 2023 must have been a resident of Kitakyushu City as of January 1, 2022, a person who will enroll in April 2024 must have been a resident of Kitakyushu City as of January 1, 2023.

※ You can still enroll in the university even if you do not pay the alumni association fee, support association fee, or the insurance.

(Note 3) If you have already paid the Support Association fee and you satisfy the following requirements, the Support Association fee is as follows.

• Those who will enroll Doctoral Program of The University of Kitakyushu **right after** obtaining a master's degree of The University of Kitakyushu.: JPY 25,000

11. Tuition Fees

Annual tuition fee JPY 535,800

(1) This amount is the current fee. If the amount or the payment method is changed while you are enrolled at the university, the new fee and payment method shall be applied from the time of the amendment.

(2) The tuition must be paid in two installments by account transfer by the due date (or the next business day if the bank is closed on that date).

12. System for Extending Your Duration of Study

The Graduate School of Environmental Engineering offers extensions to the duration of study to support students who are in employment. If eligible, you will be able to complete the curriculum over a period of time that exceeds the standard period required for graduation. This must be done in accordance with a prearranged schedule that has been approved by the Graduate School Committee. If you are enrolled in a master's program, you can arrange to extend the period of study up to 2 years, and if you are enrolled in a doctoral program, you can extend the period of study up to 3 years, with each extension being granted in one-year blocks.

The total amount of tuition fees for students making use of this system is the same as that paid by students who graduate within the standard period required for graduation.

13. Security Export Control

Based on the Foreign Exchange and Foreign Trade Act, The University of Kitakyushu has established the "Provisions for Security Export Control at The University of Kitakyushu" and implements a strict screening of the international students it accepts.

Please note that applicants might not be able to receive the education or conduct the research they desire to if their chosen field is subject to any of these provisions.

14. Other Information

《Important Notice Regarding Admission》

If the applicants in Japan whose residency status is not "Student" (Ryugaku) must obtain a Student Visa from the Immigration Bureau of the Ministry of Justice. Please note that a Student Visa is required for certain scholarship applications made after enrollment.

《Outline of Classes and Courses》

Specifics about courses are available from the internet syllabus system of the University of Kitakyushu.

Doctoral Course 12 credits are required to complete the Doctoral Program.

《Details》

- 6 or more credits from Core Subjects. (Credits can be earned from other Graduate Programs.)
- 6 credits from Thesis Research.

【Graduate Programs in Environmental Systems】

《Core Subjects》 (2 credits each)
Advanced Energy Chemistry
Advanced Kinetics and Reaction Engineering
Advanced Inorganic Materials Engineering
Advanced Catalytic Reaction Chemistry
Spectroscopic Analysis
Advanced Separation and Purification Engineering
Advanced Solid State Materials Chemistry
Advanced Process Design
Applied Materials Systems
Advanced Polymer Chemistry
Advanced Environmental Chemistry
Advanced Air Pollution and Its Controlling Engineering
Advanced Recycling Engineering
Advanced Aquatic Environment Engineering
Advanced Geosphere Environment Treatment
Advanced Recycling-System Engineering
Advanced Sustainable Sanitation Engineering
Advanced Research Methods of Environmental Issues in Asia
Special Lectures on Resources Chemical Systems
Advanced Ecological and Environmental Physiology
Advanced Functional Microbiology
Advanced Biophysics
Advanced Computational Chemistry
Advanced Biomaterials
Advanced Biosensor Engineering
Advanced Ecosystem Science
Advanced Environmental Biology
Advanced Molecular and Cellular Biosciences
Advanced Urban Environmental Management
Advanced Energy and Environmental Engineering
Advanced Sustainable Management
Advanced Environmental Information Technology and Computer Simulation
Advanced Studies in Environmental Pollution and Health Risks
Advanced Environmental Principles
Advanced Entrepreneurship and Business Startup
《Thesis Research》 (6 credits)
Thesis Research

【Graduate Programs in Environmental Engineering】

《Core Subjects》 (2 credits each)
Special Lectures on Heat Power Systems
Special Lectures on Flow Control Systems
Special Lectures on Design Systems
Special Lectures on System Control Engineering
Special Lectures on Measuring Systems
Supervised Research on the Urban Environment and Ecological Design
Supervised Research on the Environmental Design of Living Spaces
Supervised Research on Environmentally Conscious Materials Engineering
Supervised Research on Trans-Generational Architectural Design
Supervised Research on Urban Environmental Engineering
Supervised Research on Environmental Engineering in Architecture
Supervised Research on Structural Analysis
Supervised Research on Building Systems and Construction Methods
Supervised Research on Building Facilities Systems
Supervised Research on Building Materials
Supervised Research on Low Carbon Architecture and Urban Design
《Thesis Research》 (6 credits)
Thesis Research

【Graduate Programs in Information Engineering】

《Core Subjects》 (2 credits each)
Advanced Adaptive Signal Processing
Advanced Visual Information Processing
Advanced Applied Pattern Recognition
Advanced Information Security
Advanced Image Processing
Advanced Mobile Communication Systems
Advanced Information and Communication Theory
Advanced Combinatorial Optimization
Advanced VLSI Physical Design
Advanced System Control Theory
Advanced Network Architecture
Advanced Medical Engineering
Advanced Embedded Hardware Systems
Advanced Machine Learning
Advanced Behavior Analysis
《Thesis Research》 (6 credits)
Thesis Research

《Research Supervisors and Research Content of Courses in Graduate Program》

Please consult with the course director if you have any questions concerning the faculty member you would like to have as your research supervisor.

The e-mail addresses of the course directors are as follows:

Graduate Programs in Environmental Systems

【Resources and Chemical Systems】

Name	Main Themes of Research
AIKAWA Masahide	Atmospheric chemistry and sciences on air pollution and acid deposition Physical and chemical interaction between air pollutants and precipitation
AKIBA Isamu	Study on synthesis of polymer materials Research on structure and physicality of synthetic polymers
IMAI Hiroyuki	Development of functionalized materials with nano-sized spaces Development of chemical processes for utilizing various carbon resources
TERASHIMA Mitsuharu	Development of water treatment process Modeling and simulation for water treatment system
NISHIHAMA Syouhei	Separation and recovery process of rare metals from waste materials Removal process of toxic compounds in water environment
YASUI Hidenari	Environmental technologies for wastewater, sludge and drinking water Mathematical modelling biological reaction
YAMAMOTO Katsutoshi	Synthesis and catalytic application of novel porous materials Development of organic-inorganic hybrid nanoporous materials
LEE Seung-Woo	Development of functional nanomaterials and advanced sensing devices Nanomaterial engineering based on small biomolecules and volatile metabolites

【Biosystems】

Name	Main Themes of Research
ISODA Takaaki	Development of a new bio sensor and the application: 1. Bacteria sensors for food sanitation, 2. fast testing for virus and infection
UEZU Kazuya	Creation of a new type of biosensor by using specific responses of organisms, Creation of phosphoprotein separation materials targeting intracellular information paths, Design of molecular recognition materials by using computer chemistry, Development of brush fire extinguishing foam largely reducing impacts on ecosystems
KAWANO Tomonori	Engaged in international research collaboration and industry-academia collaboration focusing on (1) the interaction between the environment and living organisms (chiefly plants) and (2) natural and artificial photosynthesis.
KIHARA Takanori	Mechanism of bone mineralization Phenotype transformation mechanism of smooth muscle cells Biophysical analysis and simulation of animal cells
NAKAZAWA Koji	Development of cell patterning technology and cell microchips, Analysis of culture-minimal environments and cell differentiation characteristics
MORITA Hiroshi	Physiology of local agricultural products and development of new applications; Bio-control science of mold spores and mites; Study on novel co-culture Koji for Sake brewing; Development of submerged culture system for brewing

【Environmental and Ecological Systems】

Name	Main Themes of Research
KATO Takaaki	Economic evaluation of environmental policies, Development of education/exercise methods for social risk management
FUJIYAMA Atsushi	Study on energy management systems Study on using information technology in the environmental field
MATSUMOTO Toru	Study on design/assessment of urban/social systems for recyclable society, Study on urban environment management in Asia

Graduate Programs in Environmental Engineering

【Mechanical Systems Engineering】

Name	Main Themes of Research
INOUE Koichi	Research on thermal control systems for future space missions Research on heat exchangers for nuclear power and thermal power generation systems Research on cooling technology for power electronic devices
OKADA Nobuhiro	Studies about robotics and mechatronics technologies, especially focusing on 3-dimensional visual measurements Studies on cooperative learning of multiple self-organizing maps
KIYOTA Takanori	Study on development and application of safe, energy-saving mechanical system control method Development of power assist systems
SASAKI Takumi	Study on vibration isolation using structural and material nonlinearity Study of a vibration control system for mechanical systems and structures
CHO Changhee	Study on biomechanical engineering and biotribology, Study on improvement of clinical longevity and performance of artificial joints
CHO Hiroki	Research on material properties of shape memory alloys. Research and development of actuators and medical and welfare equipment using shape memory alloys
NAKAO Shinichiro	Research on numerical analysis of interference between shockwave and boundary layer. Research on application of laser interferometry to flow field accompanied by shockwaves.
MIYAZATO Yoshiaki	Research on application for supersonic flows of rainbow schlieren tomography and laser interferometry
MURAKAMI Hiroshi	Development of a System for 3-D Micro Metrology Using an Optical Fiber Probe Study on an intelligent machine tool Development of a high-speed air turbine microspindle for monitoring machining processes
YOSHIYAMA Sadami	Study on development and application of combustion sensing technique using an ion sensor. Study on heat cycle of waste heat recovery system

【Architecture】

Name	Main Themes of Research
GAO Weijun	Architectural/urban environment Planning/design, Building/city energy and resource planning Study on urban environment in Asia
KIDO Masae	Seismic design of steel/concrete-filled steel tube structure, Stability design method of steel/concrete-filled steel tube structure
KOYAMADA Hidehiro	Safety and Health Management on Construction, and Analysis of Accidents in Buildings Maintenance of Buildings, and Reuse of Building Materials Concreting in Hot weather Ambience
SHIRAIISHI Yasuyuki	Control of thermal and air environment in urban and architectural spaces Optimal control of technologies integrated architecture and equipment Optimal design of building equipment using multiple physics modeling
SUYAMA Hiroki	Construction materials from industrial wastes Factors in powder admixtures that affect the physical properties of cement concrete How to quantify the appearance of cement concrete
TAKASU Koji	Study on carbon negative cement-free concrete Development of high performance concrete with recycled materials Modification of by-products particles for building materials Environmental impact assessment focusing on performance of building materials
DEWANCKER Bart Julien	Study on urban planning, Study on architectural design of cities and building, Study on landscape/greening of cities and building
FUKUDA Hiroatsu	Study on architectural design, historical architecture Study on architectural planning, urban planning Study on zero carbon architecture, zero carbon city
HOKI Kazuaki	Earthquake Resistant Engineering

Graduate Programs in Information Engineering

【Computer Science】

Name	Main Themes of Research
UEHARA Satoshi	Information theory, coding theory, information security: Study on configuration method and performance assessment of signals based on mathematical background
KOGA Hiroyuki	Research on architecture, establishment and operating technology for computer network systems and traffic engineering technology
SUN Lianming	Research on system identification methodology to build mathematical models in the fields of control and signal processing Applications to analysis and design of control systems, adaptive signal processing
YAMAZAKI Yasushi	Research and development of information security and pattern recognition with a main focus on biometrics

【Applied Information Systems】

Name	Main Themes of Research
SATO Masayuki	Psychophysics on human visual perception, especially on depth perception from binocular stereopsis and visual stability across saccadic eye movements.
SUGIHARA Makoto	Design methodology for VLSI, embedded systems and automotive IT systems
TAKASHIMA Yasuhiro	Optimization algorithm, VLSI design automation methodology, High-performance computing including Quantum algorithm
NAKATAKE Shigetoshi	Study on VLSI design technologies and low power technologies of analog and digital mixed signal integrated circuits, and integration technologies of sensor systems in medical / disaster prevention fields.
NISHIDA Takeshi	Study on AI robots for smart factories Study on robot intelligence by fusion of cyber space and real space
HAYAMI Takehito	Medical test, surgery assist and treatment technique about neurological function using electric and optic devices. Equipment for behavior science.
MATSUDA Tsuruo	Biological information acquisition, Mechatronics control, cranial magnetic • electrical stimulation Rehabilitation application technology

Form 1

2023 年度 10 月 入学・2024 年度 4 月 入学 北九州市立大学大学院 国際環境工学研究科(博士後期課程)入学願書

October, 2023 Enrollment / April, 2024 Enrollment : Graduate School of Environmental Engineering,

The University of Kitakyushu, Doctoral Program ; Application Form

入学時期 Enrollment Period	<input type="checkbox"/> 4月 April	<input type="checkbox"/> 10月 October	受験番号 Examinee No.	(記入不可/Do not fill in.)
